INDEPENDENT DESIGN PROJECTS

BevFantasy.com - Founder & Designer

Serving 16+ members across 3 leagues and 40+ rosters - built on Sleeper's API

- Designed and shipped the platform end-to-end, holding every feature to one bar - would somebody screenshot this for the group chat? - turning league history into rivalry stats, a filterable trade archive, and a live earnings ledger
- Created a weekly ritual modeled on college football's AP Poll: a drag-to-rank ballot built for one-thumb voting, roster previews in place, and a live ballot count on every page - reshaped by power-user feedback before launch
- Built the Keeper Assistant, distilling eight accumulated bylaws of keeper rules into a plain yes-or-no for every player - the season it shipped, every manager set their keepers for the first time in league history
- Iterate on observed behavior: replaced dropdowns with tap-friendly avatar pickers and rebuilt the trade archive around a two-manager filter after the original went unused - 5 seasons and 500+ matchups stay current via nightly syncs

Into the Storm (Studio Gibbles) - Studio Director, Game & Systems Designer

studiogibbles.com

A solo-developed roguelike deckbuilder headed toward commercial release, currently in alpha

- Self-taught game design from scratch; direct a team of 4+ freelance artists, steering the game's visual identity through reference boards and annotated feedback rather than prescriptive briefs
- Built feedback capture into the game itself - one tap logs a screenshot, session data, and note straight to the playtester Discord - and tied every report to full run analytics, so balance decisions are grounded in data instead of guesswork
- Ran structured blind playtests, translating observed friction and confusion into 200+ iterations on the core loop and UI

EXPERIENCE

Risk Enablement Specialist | DraftKings | Remote

June 2025 – Present

Senior Risk Withdrawals Associate | DraftKings | Remote

Aug. 2023 – June 2025

- Designed and shipped Yggdrasil, an org-chart explorer collapsing 3 internal systems into one visual interface - A/B-tested with a pilot group, live in 2 weeks, and adopted org-wide as a leadership-endorsed internal home page
- Lead a 6-person team as PM on the Risk Case Reduction Strategy, a top 2026 org priority targeting a 20% reduction in case volume through automation, AI, and process redesign
- Designed and built an internal anomaly-detection tool for Risk Ops work queues; iterated the interaction model directly based on manager feedback, adding a 3-way tagging system (false positive / expected / confirmed issue) that surfaced real upstream data quality issues
- Appointed Head of the Fraud Mitigation Taskforce, overseeing regulatory compliance across all regulated U.S. states, Canada, and international jurisdictions; built DraftKings' centralized Regulatory Library and lead recurring leadership forums on emergent risk
- Led cross-functional workflow automation initiatives generating ~\$1.5M in annual impact
- Promoted from Senior Risk Withdrawals Associate after a competitive internal Project Management internship

Risk Analyst | Digital Gaming Corp. (Betway) | Arlington, VA

Jan. 2022 – Aug. 2023

- Built an automated process using Excel and Python that increased Venmo withdrawal processing speed by 40%
- Performed thousands of fraud and AML reviews on customer accounts and withdrawals; represented hundreds of payment disputes and chargebacks

Early Career - Congressional & Legislative Internships

2019 – 2020

- Office of Congresswoman Lori Trahan; Office of MA State Rep. Jerald A. Parisella - constituent casework, legislative research, and district-based issue resolution

EDUCATION

University of Massachusetts Lowell | B.A., Political Science, Law & Politics

May 2021

- Graduated magna cum laude, Dean's List (5 semesters)

SKILLS

0-to-1 Product Design • Design Systems • User Research & Iteration • Cross-Functional Collaboration • Workflow Automation • Data Analysis

OFF THE CLOCK

- Lifelong film passion, logged every film I've seen - 1,500+ and counting
- Long-distance runner, completed: Quebec, Philadelphia, and Buffalo marathons
